

SHARP®

BP80C70 BP80C80

High-Speed Colour Office Series

The High-Speed Colour Office Series from Sharp

Intelligent devices to help businesses work simply smarter.

The BP80C70/80C80 High-Speed Colour Office Series delivers high performance, advanced features, and the reliable output expected in today's demanding workplaces. Engineered for high-volume environments such as in-house print shops, these systems offer advanced paper handling, brilliant colour output and professional finishing once reserved for commercial print operations. With comprehensive, multi-layered security features, the Colour Office Series provides strong protection for your data while delivering the productivity you need.

A Smart MFP That Drives Efficiency

These MFPs leverage the latest technology to help users manage their workflow and get their work done with ease and efficiency. Innovative features like AI assisted scanning with auto skew correction and image format detection help ensure scanned documents are processed correctly.

Advanced Colour Workflow

A Fiery print server is available to easily turn in-house printing into a professional operation. Users can utilize Fiery Command WorkStation® directly on the 10.1" control panel to set up and print even the most complex jobs.

Build the System of Your Choice

From flexible media handling to high-performance finishing, the BP80C70/80C80 High-Speed Office Series are available in many configurations and can accommodate all size business environments.

Comprehensive Data Security

The Colour Office Series utilizes leading, multi-layered security features to help ensure that document data and personal information remain safe. As an extra level of protection these models have been penetration tested by Keypoint Intelligence.

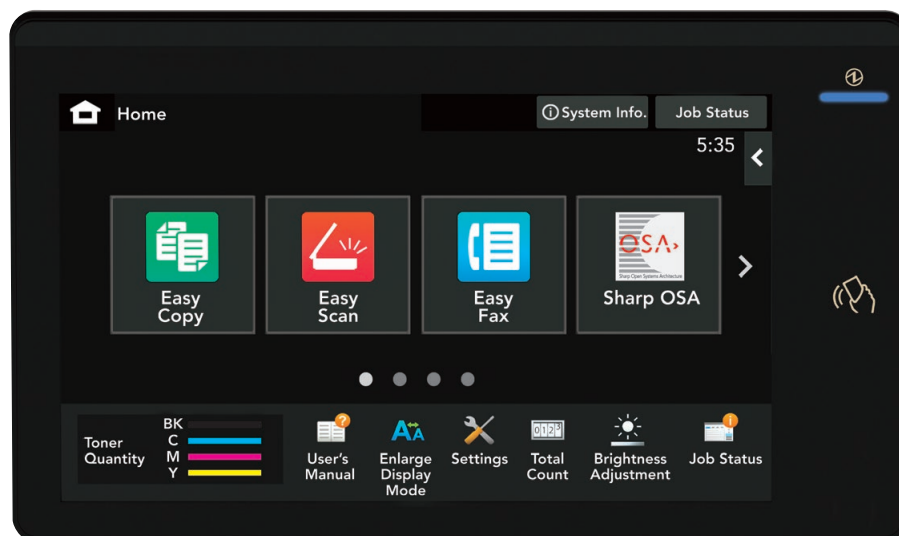

A Responsible Approach to Design

Sharp continues its commitment to sustainability by designing document systems that are compliant with EPEAT, ENERGY STAR and more. These models utilize approximately 50% recycled plastic and offer among the lowest TEC values in their category.

Smart features that optimize productivity

Transforms productivity to meet the demands of high volume office users.

- ✓ AI assisted scanning
- ✓ Integrated access to cloud services
- ✓ Strong multi-layer security

10.1" (diagonally measured) customizable touchscreen display.

Finishing options allow for booklets, sorting, trimming and hole punching.

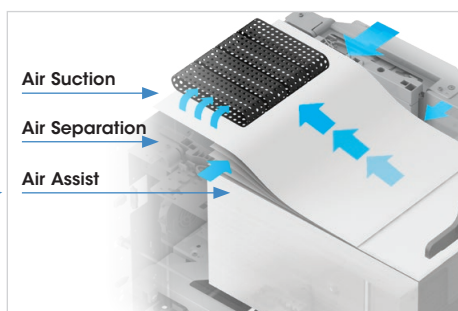

Built-in retractable keyboard for convenient data entry.

- 300-sheet duplexing single-pass feeder scans up to 300 images per minute with standard double feed detection.
- Flexible paper handling with available air-assist technology easily manages media weights up to 300 gsm.
- Saddle-Stitch finishers make high quality booklets up to 80-pages long.
- Smart controller design ensures maximum device uptime with self-healing features that remediate CPU errors and automatic firmware updates that keep the device current.
- Provides seamless access to Microsoft services with Microsoft Entra ID in Azure native environments.
- Intuitive touchscreen display is easy to navigate, enabling a user to execute jobs quickly and efficiently.
- Collaborate with remote workers using popular cloud services, such as Microsoft Teams, Google Drive™, Dropbox and others.
- Leading security features such as BIOS Integrity Check with self-recovery, Firmware Attack Prevention and Intrusion Detection help safeguard against potential threats.
- Supports the Microsoft Modern Print Platform including Universal Print and driverless printing with the Sharp Print Support Application (PSA).
- Supports automatic firmware updates and self-healing technology to help optimize performance, maximize uptime and enhance reliability.
- Designed with approximately 50% recycled plastic and offers among the lowest TEC value and stand-by power consumption in its class.

Advanced capabilities that elevate office workflows

The Sharp High-Speed Colour Office Series delivers exceptional paper handling.

The BP80C70 and BP80C80 are engineered to deliver the high-performance results today's operators demand. Both models maintain full engine speed even when printing on heavy media up to 220 gsm and support robust duplex copying and printing up to 300 gsm. These capabilities allow organizations to produce more work in-house reducing turnaround times and costs.

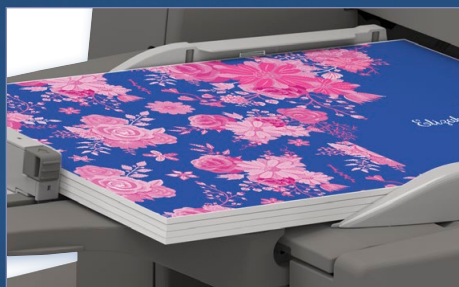

Optional triple air feed paper trays help ensure reliability.

Production Class Paper Handling

The Colour Office Series offers up to 13,500-sheet paper capacity and supports media types up to 300 gsm.

Create Unique Documents

Automatically insert special media such as covers, preprinted pages, or tabbed inserts into your documents, simplifying the creation of complex documents.

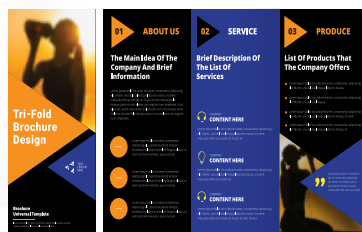

Feed cover stock and chapter-inserts through the optional Two-tray Inserter on media up to 360 gsm.

Tackle specialty media with ease using high-performance air-feed paper handling with the optional Two-tray Inserter.

Production Punch, Crease and Perforation

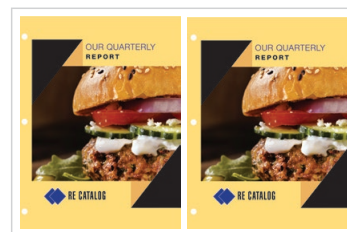

With the fully automated GBC® SmartPunch™ Plus in-line professional finishing solution, users can double punch, crease and create perforations. Customers can expand their finishing capabilities like never before. The SmartPunch Plus operation panel makes setting up jobs quick and easy.

Creasing capability for precise folding.

Adjustable perforation.

Double punch processing for two-up sheets.

Next-level colour, smarter production with the Fiery BPPE14 print server
The Fiery® BPPE14 helps deliver advanced colour automation on a modern, secure platform, helping achieve consistent results with less effort and greater confidence.

Simple, reliable colour:
one-step management
with consistent brand
accuracy across
every job.

Colour Made Simple and Reliable

- Achieve accurate, repeatable colour with 1-step colour management, simplifying calibration and profiling into a single guided process.
- Reproduce brand colours with confidence using Fiery TrueBrand™, which helps ensure consistent results across jobs and operators.

Keep Production Moving without the Guesswork

- Manage all jobs from a single intuitive interface with Fiery Command WorkStation®, providing full visibility and control over production.
- Use integrated tools to optimize workflows — Job Groups, Print Scheduler and Print Time Estimation help reduce repetitive setup, prioritize jobs and improve production planning.

Built for Modern Environments

- Powered by Debian 12 Linux, delivering a secure, stable and future-ready platform.
- Runs on Fiery FS700 system software, bringing enhanced performance and workflow capabilities.
- Designed for today's IT environments, with improved data and network security to help protect information and ensure reliable connectivity.

Expand as Your Needs Grow

- Automate repetitive tasks and streamline production with the Fiery Automation Package, enabling touchless workflows, job routing and seamless integration with existing systems.
- Enhance performance with the Fiery JobExpert™ and PDF Processing Kit for intelligent automation and advanced image rendering.

Smart · Secure · Sustainable

Innovative and scalable for any environment

The Sharp High-Speed Colour Office Series provide high quality output with unique capabilities.

Versatile Finishing Options

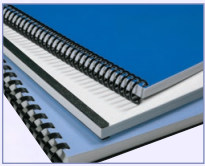

Select the 4,000-sheet stacking finisher with 100-sheet stapling, or the saddle-stitch finisher, which can produce professional grade booklets up to 80-pages long.

Antivirus Protection

Leading security features plus optional Bitdefender antivirus leverages AI and other advanced technologies to block malware threats and network intrusions.

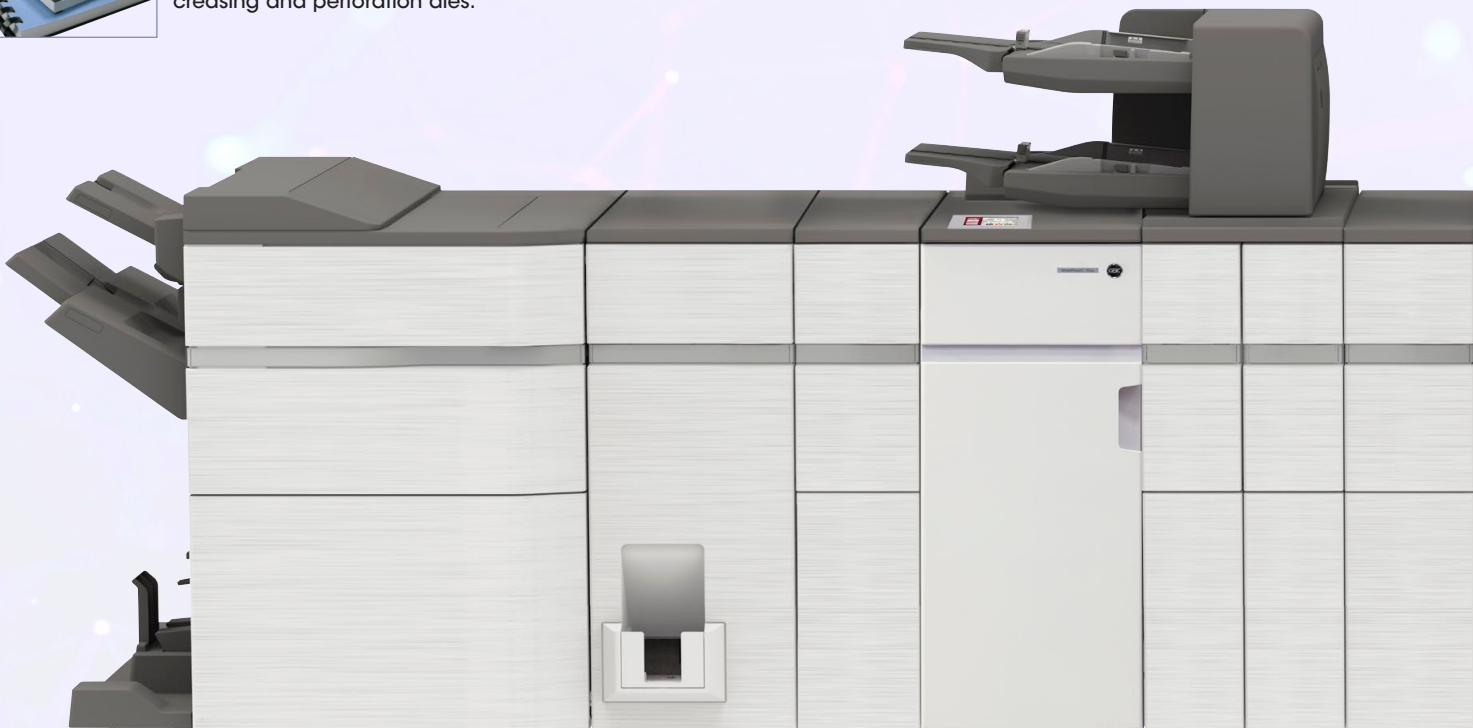

High Quality Printing

1200 x 1200 dpi resolution with genuine Adobe PostScript produces razor sharp documents.

GBC® SmartPunch™ Plus

Production punching system for creating professional bound booklets with ten common punch styles, now with available creasing and perforation dies.

Plockmatic Production Booklet Maker System

Produces 120-page professional, square-fold spine booklets in-line at engine speed. Combine GBC creasing for precise folds to help keep image quality integrity on the spine.

Multi-Folding Unit

Provides a variety of folds, including Z-fold, C-fold, Accordion-fold, Double-fold and Half-fold.

Z-fold

C-fold

Accordion-fold

Double-fold

Half-fold

Two-Tray Inserter

Produce professional looking documents with pre-printed covers and chapter inserts up to 360 gsm.

Modular design for maximum flexibility

Custom configurations deliver bottom line results.

Duplexing Single Pass Feeder (DSPF)

Standard 300-sheet dual head document feeder scans both sides of a document in a single pass at up to 300 ipm.

Smart Scan

AI assisted scanning technology can automatically adjust resolution, compression, as well as detect original size and adjust for skew.

Smart Touchscreen

Enhanced touchscreen is easy to use and delivers the responsiveness and accuracy users expect.

Built-in Adjustable Keyboard

Built-in QWERTY keyboard enables easy data entry and job management.

500-sheet Multi-bypass Tray

Feeds paper sizes from 5.5" x 8.5"R to 13" x 19", as well as banner paper up to 13" x 51.8" with the optional BPLT10 Long Paper Feeding Tray.

3,000-sheet Standard Paper Capacity

Includes a 2,000-sheet letter-size tandem tray and two 500-sheet letter/legal/ledger size trays that offer enhanced auto tray switching. Select trays can even feed up to 50 Monarch/COM9/COM10 envelopes and heavy paper up to 300 gsm for ultimate flexibility.

Sharp Colour Consistency System

Advanced auto-calibration helps ensure colour output is always at peak performance.

Reliable Paper Handling

The advanced 5,000-sheet large capacity paper tray option utilizes triple air-feed technology, which directs air flow with precision for proper paper handling and enhanced media support. Two large capacity trays can be connected in tandem to achieve a maximum on-line paper capacity of 13,500 sheets.

Plan a configuration to your exacting requirements

Designed to perform, the High-Speed Colour Office Series combines intelligent paper handling and high-end finishing solutions to power productive, seamless workflows.

BP80C80 shown with 3,000-sheet large capacity cassette, 100-sheet finisher and 100-sheet bypass tray.

BP80C80 shown with Curl Correction Unit, Inserter, Multi-folding Unit, 100-sheet Saddle-Stitch Finisher, 5,000-sheet air-feed large capacity tray, 500-sheet multi-bypass tray and status indicator.

Modular Finishing Options Make it Easy

Choose from several high performance finishing systems that offer up to 100-sheet stapling, professional saddle-stitch booklet-making and three-hole punching.

Build the System of Your Choice

More advanced configurations include a square-fold spine booklet-making system, a professional punching system, a two-tray inserter, a multi-folding unit and a trimmer unit.

BP80C70/80C80 Main Unit

3,500-Sheet Letter Large Capacity Cassette (LCC)

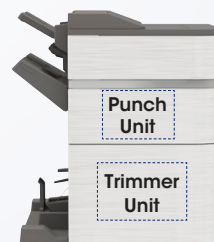

3,000-Sheet Ledger Large Capacity Cassette (LCC)

Multi-Folding Unit

Two-Tray Air Feed Inserter

100-Sheet Staple-Saddle Finisher

100-Sheet Staple-Stacking Finisher

GBC SmartPunch™ Plus

5,000-Sheet Large Capacity Tray (LCT)

500-Sheet Multi-Bypass

Long Paper Feeding Tray (LCT)

A smart design that helps drive efficiency

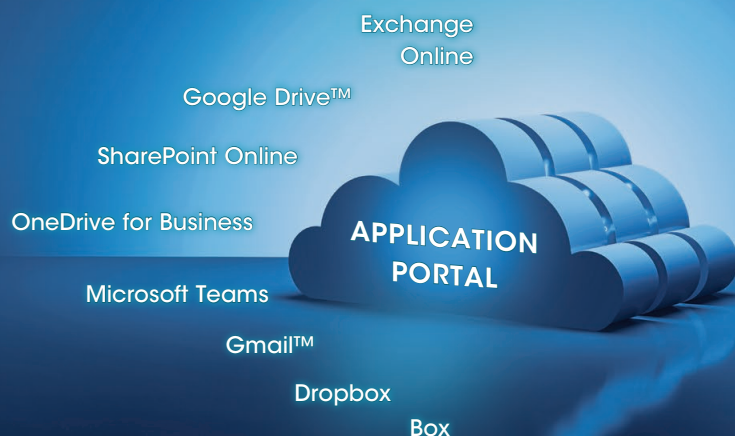

From media handling to workflow and collaboration, the High-Speed Colour Office Series delivers the features businesses need to get the job done.

Sharp document systems can streamline your workflow, so you can focus on what matters most, your business. With fast scanning speeds of up to 300 images per minute and a high-capacity 300-sheet duplexing single-pass feeder, these models can handle large jobs with ease. AI assisted image processing helps optimize resolution, compression and document alignment, correcting skewed pages and detecting original sizes on the fly. Easy Modes streamline everyday tasks—making scanning workflows more efficient.

Print, Scan and Share Documents Easily

Collaborate effortlessly—whether in the office or working remotely. With Cloud Connect, your team can easily access popular cloud services like Microsoft Teams, Google Drive and more, directly from the MFP. The Sharp Application Portal simplifies management, enabling quick installation and updates right from the device's touchscreen.

Integrate with Email Applications

In addition to native capability, the Email Connect feature enables seamless scan-to-email integration with Microsoft Exchange/365 and Gmail™ user accounts, making it easy to identify the sender of scanned files.

Intelligent Image Processing¹

Scan documents to popular file formats including Microsoft Word, PowerPoint and Excel, as well as Searchable PDF, Encrypted PDF and others. Direct Print the same file types from thumb drives, cloud applications and mobile devices.² Adobe Embedded Print Engine direct prints PDF files with greater speed and rendering accuracy.

Flexible Printing Solutions

Standard PCL® 6 and Adobe PostScript® 3™ printing systems. Serverless Print Release enables users to print a job and release it from up to eight supported models. The Office Series also supports the Modern Print Platform from Microsoft, which includes Universal Print and Windows Protected Print mode. A Sharp Print Support Application (PSA) is also available, which provides a customized printing experience.

¹ Some features require optional equipment and/or software.

² This function is enabled via Qualcomm DirectOffice technology.

Centralized device management helps ensure optimal uptime

Seamlessly connect technology and drive service efficiency.

Manage Devices From Anywhere

Device configuration, status, and security are managed remotely via a cloud-based solution—perfectly suited for today's distributed and flexible work environments.

Do More with Less

Automate tasks like power management to minimize time on devices and increase device-readiness through central control.

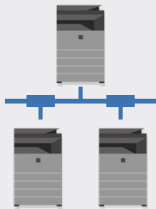

Keep Your Printers Secure

Deploy consistent security policies for MFPs and printers, monitor device security and firmware status and auto remediate issues in real time.

Enhance Employee Experience

Maximize device uptime to help ensure uninterrupted employee productivity and allow focus on critical tasks.

Remote Service

Remote Setup

Firmware Management

System Integration (Meter, Toner, Event)

Server-based Sharp Remote Device Manager (SRDM) is also offered for customers who prefer to keep the solution on-site, offering similar capabilities such as remote device and security management.

Collaborate with quick access to mobile devices

The Office Series makes it easy to share data with tablets and smartphones even in busy office environments.

Print with Popular Mobile Technologies

The models support printing using popular mobile technologies such as Apple AirPrint®, and Android™ printing with the Sharp Print Service plug-in.

Scan and Print with Sharpdesk Mobile

Quickly scan and print files from your tablet or smartphone with the free Sharpdesk Mobile app.*

* Go to www.sharp.ca for a list of supported equipment and operating systems.

Multi-layer security features to help businesses stay a step ahead of hackers

The High-Speed Colour Office Series leverages advanced security technologies to help protect sensitive data and support regulatory requirements.

BIOS Integrity Check at Startup with Self Recovery

Helps protect system from malware attacks.

Trusted Platform Module (TPM 2.0)

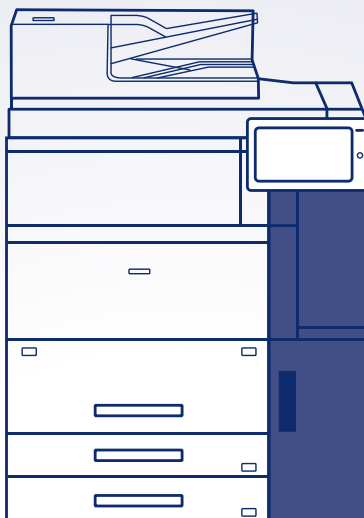

Provides an added layer of protection to safeguard your data.

Firmware Attack Prevention

Checks for abnormal firmware at startup and can restore the original.

End-of-Lease Data Erase

Can protect privacy by deleting all data and personal information at trade-in time. (supports NIST SP800-88 data erase)

Automatic Firmware Updates

Ensures security and other system updates are done as soon as they become available.

Application Allowlisting

Prevents unauthorized files, applications and firmware from being loaded.

Real-time Intrusion Detection

Detects abnormal connection requests and denies access.

Optional Bitdefender Antivirus

Provides comprehensive protection from virus threats.

- **Seamless access to Microsoft services with Microsoft Entra ID Authentication** (in Azure native environments).

- **Active Directory (AD) Integration** Enables the MFP to join the network domain as a computer, making it a trusted device.

- **Supports AD Group Policy** Allows administrators to centrally manage select security settings and enforce their own policy.

- **256-bit AES Encryption** Ensures data that resides on the local drive is protected.

- **Protects Access to the Device** Supports IP/MAC address filtering, 802.1x authentication and port control protect access to the device.

- **Protects Data in Transit** IPsec and SMB 3.1.1 protocols, as well as TLS 1.3 use data encryption to protect data.

- Integrates with **ConnectWise SIEM** (Security Information and Event Management system).

- **Complies with the latest Common Criteria** requirements for HCD cPP v.1.0e when optional Data Security Kit is enabled.*

- **Authority Groups** Enables administrators to define various groups for different users, which can limit or restrict access to specific features.

- **Sharp is ISO/IEC 27001:2022 certified** and committed to delivering high level information securely.

- **Keypoint Intelligence Security Validation**
The High-Speed Office Series models have been security validated by Keypoint Intelligence and Agile Cybersecurity Systems.

High-Speed Colour Office Series BP80C70/80C80

Environmental Commitment

Sharp is committed to environmental sustainability and corporate responsibility.

A Responsible Approach to Design

These models adhere to the Sharp Corporation Green Products Guidelines, which requires designing products that consume less power, use approximately 50% recycled materials and reduce materials used in packaging.

Toner Recycling Program

Sharp offers zero-waste-to-landfill recycling for Sharp consumables at no cost to our customers and encourages them to recycle their Sharp toner cartridges by providing them with a pre-paid recycling kit for return to our facility. Please visit <https://sharp.ca/en/toner-recycling> to learn more.

Environmental Commitment

These models are ENERGY STAR® 3.2 qualified and RoHS compliant. These products also have among the lowest TEC values in their category as well as one of the lowest stand-by power consumption ratings. The Sharp Office Series are EPEAT® Gold registered.

For more information about Sharp's environmental leadership including information about energy-efficient products, electronics, or toner cartridge recycling, please visit <https://sharp.ca/en/environmental-policy> to learn more.

The High-Speed Colour Office Series. Smart. Secure. Sustainable. Designed with intelligent features that offer seamless, secure collaboration while supporting sustainability in modern office environments. To learn more, visit www.sharp.ca.
